

FleetAdvance Mobile App: Registering for Express Cash

If you add a card with Express Cash to the FleetAdvance Mobile app, you can view the card’s balance and deposit funds into a bank account set up with Comdata. You must register in order to use this feature. Follow the steps below:

1. Select **Manage Card** (displays only if the card is set up for Express Cash).

2. Read the descriptions on screen and then select **Register**.

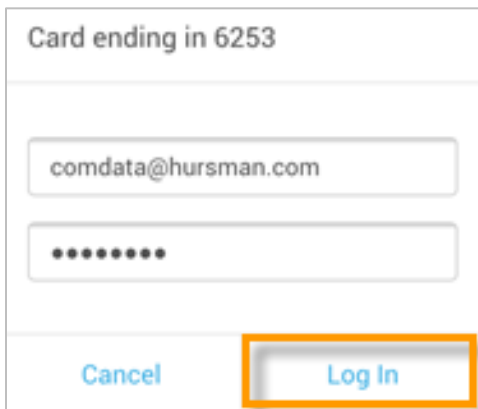

3. Enter an email address, password, and confirm the password. Then, select **Register**.

Note: Be sure this information is easy to remember, as you cannot reset your login credentials. If you forget this information, you will need to reregister.

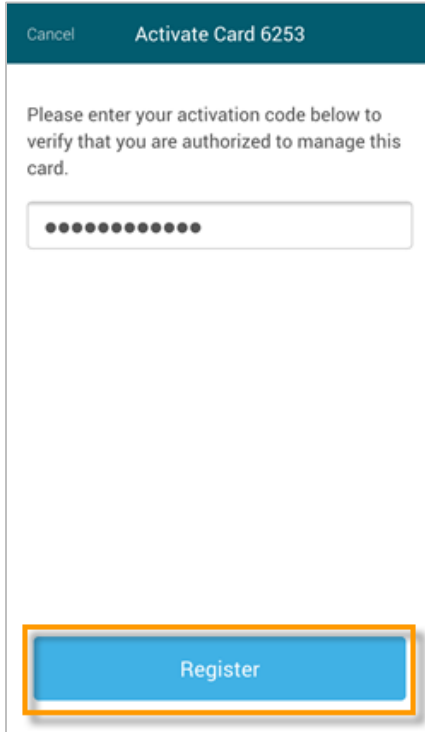

4. Enter the email address and password you registered and then select **Log In**.

- 5. Enter your Activation Code and then select **Register**.

Note: The activation code is usually your employee ID or driver’s license number, depending on your fleet account’s set up. If you do not know the activation code, contact your program administrator.

- 6. You are now set up to use the Express Cash features. The next time you select **Manage Card**, the Card Management screen will display, allowing you to view the card’s balance and perform direct deposits.

Note: If your session times out, you may be prompted to log in again with your email address and password.
