~ Drive Safe!

- Inspect your vehicle
- Slow Down
- Give yourself some extra space
- Stay smooth, avoid anything that reduces traction on slippery roads
- Pay attention to the tire spray. Less spray could indicate the roadway is freezing - use extra caution
- Let there be light, use your headlights
- Take evasive action. Sometimes it's better to take evasive action than hard braking, especially on snow covered roads. Carefully maneuver around.
- When in doubt, Pull over
- Be prepared – Have extra clothes, blankets, flashlight, etc.
- Check twice – use extra caution and look twice before proceeding through intersections or turning.
