

Safety Bulletin

June 2017

Owner-Operator Quote of the Month

“Take an extra five minutes to double check everything before you head out. You may catch something you didn’t see the first time around.”

**~ Will Jones
Medallion Transport
Owner Operator**

To Report or Not To Report.....

When it comes to reporting accidents and claims *report them all*. Whether it was your fault or not (even if something seems very minor) please remember to report all incidents. It is everyone’s responsibility to mitigate so let us know ASAP. Hotline numbers are listed on the back side of your wallet card. Need a replacement? Just let us know. As Always – Drive Safe!

Not All GPS Systems Are Created Equal

So why does it matter? Some GPS systems are specifically designed for CMVs. If you use a system that doesn’t provide you with important info like route restrictions, such as low bridge overpasses, the shortcut you thought would save you time and fuel may very well end up costing you a lot more money than you bargained for.

When choosing a GPS System:

- *Select a system intended for CMVs
- *Before you head out, type in all relevant info so the system can provide you with the appropriate route
- *Follow the route recommended by the system but use common sense.
- *Always obey traffic control devices and advisories – especially if they provide restrictions the GPS didn’t warn you about
- *Do not engage in distracted driving (don’t enter address info while driving)
- *Update your maps often –not all GPS systems automatically update the maps

NEW! Load Securement Courses Now Available

Medallion Transport Holdings kicked off its first Load Securement Course last month. Interested in making a change or just want a refresher course? We’re here to help!

Load Securement Courses are currently being scheduled in Mooresville, NC and Baytown, TX. If you are interested, give Driver Services a call to inquire about the next class schedule.

School’s Out For Summer....Come On, You Know You’re Now Singing This

Schools across the nation are exiting for the summer break. As such, young less experienced drivers will be filling the roadways as will many families and friends (many of them yours) to hit that awesome vacation spot getaway. Plan ahead and be patient! You are the professional driver. Stay alert and be prepared to react. Drive safe this summer season – the motoring public depends on you. *Drive Safe*

Have Pics of Your Truck?

Send them to us so we can proudly share on the websites!

Please remember to turn your logs in with your load paperwork. Doing so will keep you current all the time.
